EDUCATION

Intermediate:

Gyan Niketan VVC : 90%

High School:

Gyan Niketan VVC : 70%

B.Tech — AI & ML

Dr. A.P.J. Abdul Kalam Technical University (AKTU)

[Mahatma Gandhi Mission College Of Engineering And Technology]

[Expected Graduation Year: 2027]

SKILLS

Python

C

Java basics

Machine Learning

Logistic Regression

Data Preprocessing

HTML & CSS

My sql basics

Excel basic

SOFT SKILLS

• Problem Solving

• Communication(English,Hindi)

Team collaboration(member of training and placement office)

PROFILE

B.Tech student specializing in Artificial Intelligence and Machine Learning with hands-on experience in Python, machine learning and beginner-level web technologies. Interested in building practical AI solutions and looking for an AI/ML internship where I can strengthen my development, data and model-building skills.

INTERNSHIP EXPERIENCE

AI Intern — Unified Mentor Pvt. Ltd. [2025August– 2025 October]

- Worked with Python for data handling, preprocessing and machine-learning tasks.
- Implemented and practiced Logistic Regression for supervised learning problems.
- Applied basic model evaluation concepts and interpreted machine-learning results.
- Improved understanding of the end-to-end ML workflow: data preparation → training → evaluation.

AI Intern—The Career Spark [2026 July- 2026 August]

- Data collecting, labelling and organizing datasets for machine learning models.
- Read research papers, reproducing published results and explored new AI techniques
- Measured model performance,,identifying errors and suggesting improvements
- Worked with software engineers, data scientists, products managers, and researchers on AI projects.

PROJECTS

AI Travel Planner / Trip Planner[Ongoing]

• Developing a travel-planning solution that can suggest travel options, estimated budget, hotels and weather information.

• Exploring AI/ML-based recommendations to make trip planning more personalized.

• Technologies: Python, AI/ML, web technologies.

Medicine Information AI System

• Built a Python-based system for storing and retrieving medicine information and its uses.

• Designed the system to handle medicines already present in the database and support adding information for new medicines.

• Technologies: Python, database concepts, AI-assisted information retrieval.

Calculator Web Project

• Created a beginner-friendly calculator project to practice web development fundamentals.

• Technologies: HTML, CSS and JavaScript.

TECHNICAL SKILLS

Programming: Python | Java — Beginner

Machine Learning: Logistic Regression, data preprocessing, basic model evaluation

Web: HTML, CSS — Beginner

Tools: numpy, VS Code,

CERTIFICATIONS & LEARNING

• AI / Machine Learning internship experience — The Career Spark

• Continuously learning Python, machine learning and web development.

CAREER OBJECTIVE

To begin my career in AI/ML by contributing to real-world projects, learning from experienced professionals, and developing strong skills in Python, machine learning and practical AI applications.
